Dear Fairview families,

As a part of the provincial K-12 guidance, reflected in the [SD42 COVID-19 Communicable Diseases Prevention Plan](#), local medical health officers may recommend regional prevention measures during times of increased community risk.

We have been advised by Fraser Health that there is an increase in transmission in the surrounding community that may be impacting Fairview Elementary. In the past week, our school experienced two clusters that saw two classes going into self-isolation. In recognition of this increase in transmission, Fraser Health is recommending the implementation of additional, short-term, enhanced measures for our school.

Because we have already had a number of the recommended enhanced measures in place since the beginning of the school year, I have marked as *new* the measures that have been recommended and are being added:

- Staggered lunch times
- Outside physical education classes when possible
- Students remain in their specific class groups during instructional time, which includes the measure of pausing buddy classes **(new)**
- Reducing intensity of physical activity when inside the gym **(new)**
- Changing seating plans where possible to reduce face-to-face contact **(new)**
- Maximizing, where possible, the physical space in a room during instruction **(new)**

These enhanced measures will be in place until October 21, 2021, at which point Fraser Health will reassess community risk and provide our school with an update.

Please be assured that the health and safety of our students and staff is always our first priority. We will continue to work closely with public health to ensure we have all the necessary preventions and protections in place.

As always, if you have any questions or concerns, please feel free to contact me at the school. If you have questions specific to a COVID-19 exposure at the school, please contact the Fraser Health COVID-19 Call Centre at 778.368.0123.

Sincerely,

Jenn Gallop
Principal
