Eye See ... Eye Learn®

What is Eye See ... Eye Learn®?

Eye See ... Eye Learn® is a program that provides kindergarten students with a comprehensive eye exam from a participating B.C. doctor of optometry. If required, kindergarten students will also receive one free pair of eyeglasses.

Good Vision = Better Learning

Good vision is an important part of learning. Did you know that...?

- 1 in 4 school-age children has an undetected vision problem?
- 80% of a child's learning is based on vision?
- Children rarely complain of vision problems since they don't realize that they see the world differently than others?
- Vision problems are often mistaken as other developmental problems like dyslexia or ADHD?

Vision Screen vs. Comprehensive Eye Exam

Some schools offer vision screenings. However, these are not a substitute for a comprehensive eye examination by a doctor of optometry since it involves only a limited number of simple tests that cannot detect all eye problems.

As many as 50% of children with vision problems are able to pass a vision screening.
